

WHEN TO USE Use when inbound calls go unanswered, overflow, or hit voicemail after hours.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Monthly inbound calls

Unanswered / missed %

Legitimate new-business %

Scenario capture / close %

Average customer revenue

Optional gross margin %

CORE LOGIC Calls x missed % -> qualified % -> scenario close % -> customer value

OUTPUTS / DISCUSSED SCENARIO

Unanswered calls

Theoretical revenue exposure

Qualified missed opportunities

Scenario customers

Monthly recoverable scenario

Annual recoverable scenario

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Exposure is not guaranteed revenue. Do not assume every missed call would become a customer.

WHEN TO USE Use when inbound leads are contacted slowly or inconsistently.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Monthly inbound leads

Current conversion %

Scenario conversion %

Average customer revenue

Current response time

Desired response workflow

CORE LOGIC Leads x conversion rate; compare current vs scenario conversion

OUTPUTS / DISCUSSED SCENARIO

Current customers / month

Scenario customers / month

Additional scenario customers

Monthly revenue scenario

Annual revenue scenario

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Do not invent a conversion lift. Use client data or a clearly labeled scenario.

WHEN TO USE Use when estimates, proposals, or quotes are not followed up systematically.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Estimates / proposals per month

Unsold after first presentation %

Legitimate recoverable %

Scenario recovery / close %

Average sold job / contract revenue

CORE LOGIC Estimates x unsold % -> recoverable % -> scenario close % -> job value

OUTPUTS / DISCUSSED SCENARIO

Unsold estimates

Theoretical exposure

Qualified recoverable estimates

Scenario recovered customers

Monthly recoverable scenario

Annual recoverable scenario

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Not every unsold estimate is recoverable. Separate total exposure from realistic recovery.

WHEN TO USE Use for old leads, unsold estimates, former customers, or inactive databases.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Inactive leads / contacts

Contactable %

Response-rate scenario %

Qualification / appointment %

Close rate %

Average customer value

CORE LOGIC Database x contactable % x response % x qualification % x close % x value

OUTPUTS / DISCUSSED SCENARIO

Contactable leads

Responses

Qualified / appointments

Scenario customers

Potential revenue scenario

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Never multiply the whole database by customer value and present it as recoverable revenue.

WHEN TO USE

Use when missed appointments create lost revenue or wasted schedule capacity.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Appointments per month

Current no-show %

Scenario no-show %

Immediate appointment value

Optional downstream value

CORE LOGIC

Appointments x (current no-show % - scenario no-show %) x appointment value

OUTPUTS / DISCUSSED SCENARIO

Current no-shows

Scenario no-shows

Recovered appointments

Monthly revenue represented

Annual revenue represented

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE

Prefer conservative first-appointment value unless downstream value is supported by client data.

WHEN TO USE Use when repetitive work consumes employee time that could shift to higher-value work.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Employees affected

Repetitive hours / employee / week

Loaded hourly labor cost

Addressable % of repetitive work

Productive weeks / year

CORE LOGIC Employees x hours/week x weeks x addressable % x loaded hourly cost

OUTPUTS / DISCUSSED SCENARIO

Annual repetitive hours

Addressable hours

Potential annual capacity value

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Capacity value is not automatic payroll savings. This form is never a justification to fire staff.

WHEN TO USE Use when sellers lose selling time to CRM entry, notes, proposals, scheduling, or reporting.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Salespeople affected

Admin hours / salesperson / week

Loaded hourly labor cost

Addressable %

Productive weeks / year

CORE LOGIC Salespeople x admin hours/week x weeks x addressable % x loaded hourly cost

OUTPUTS / DISCUSSED SCENARIO

Annual sales-admin hours

Recovered selling-hour scenario

Potential annual capacity value

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Frame the result as recovered selling capacity, not headcount reduction.

WHEN TO USE Use when repetitive or preventable workflow load is contributing to overtime.

COMPANY

DATE

SALESPERSON

INPUTS Source: V=verified | C=client estimate | B=benchmark | A=assumption

Employees receiving overtime

OT hours / employee / week

Overtime hourly cost

OT tied to addressable workflow %

Scenario reduction %

Productive weeks / year

CORE LOGIC Employees x OT hours x weeks x OT rate x workflow % x scenario reduction %

OUTPUTS / DISCUSSED SCENARIO

Annual OT cost tied to workflow

Potential annual overtime value

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Only include overtime caused by the addressable workflow. Do not assume all overtime disappears.

WHEN TO USE Use for recurring reports, spreadsheet consolidation, and repeat administrative cycles.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Employees involved

Hours per cycle

Cycles per year

Loaded hourly labor cost

Addressable %

CORE LOGIC Employees x hours/cycle x cycles/year x addressable % x loaded hourly labor cost

OUTPUTS / DISCUSSED SCENARIO

Annual manual hours

Addressable hours

Potential annual capacity value

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Time recovered is capacity unless a real cost reduction is documented.

WHEN TO USE Use for invoices, claims, applications, estimates, contracts, forms, or other repeat document work.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Documents per month

Minutes per document

Loaded hourly labor cost

Processing-time reduction scenario %

CORE LOGIC Documents x minutes / 60 x reduction % x 12 x loaded hourly labor cost

OUTPUTS / DISCUSSED SCENARIO

Current monthly processing hours

Addressable monthly hours

Potential annual capacity value

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Keep human review where legal, medical, financial, safety, or regulatory judgment is required.

WHEN TO USE Use when the business spends on ads but cannot clearly connect spend to qualified leads or customers.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Monthly ad spend

Monthly leads

Qualified leads

Customers acquired

Average customer revenue

Scenario cost / qualified lead

CORE LOGIC Spend / leads; spend / qualified leads; spend / customers; compare scenario efficiency

OUTPUTS / DISCUSSED SCENARIO

Current CPL

Cost / qualified lead

Customer acquisition cost

Scenario qualified leads at same spend

Additional qualified lead scenario

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Call suspected inefficiency "spend worth auditing" until an actual audit proves waste.

Hiring Deferral / Capacity Planning

WHEN TO USE Use when growth is creating pressure to add administrative or support headcount.

COMPANY

DATE

SALESPERSON

INPUTS Source: V=verified | C=client estimate | B=benchmark | A=assumption

Planned role / function

Annual compensation

Loaded-cost / burden estimate

Recruiting + onboarding cost

Workload driving the hire

Addressable workload %

CORE LOGIC Loaded annual role cost + recruiting/onboarding; then evaluate addressable workload

OUTPUTS / DISCUSSED SCENARIO

Estimated first-year loaded cost

Potential portion tied to addressable work

Capacity / deferral scenario

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE This does not mean "replace a future employee." It tests whether better systems can delay unnecessary overhead.

WHEN TO USE Use when employees manually chase receivables or collections follow-up is inconsistent.

COMPANY

DATE

SALESPERSON

INPUTS

Source: V=verified | C=client estimate | B=benchmark | A=assumption

Employees involved

AR follow-up hours / week

Loaded hourly labor cost

Addressable %

Outstanding receivables

Current DSO

Scenario DSO

CORE LOGIC Labor capacity: employees x hours x weeks x addressable % x hourly cost

OUTPUTS / DISCUSSED SCENARIO

Annual AR labor hours

Potential annual capacity value

Potential working-capital improvement

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE Faster collection is working-capital improvement, not new revenue.

WHEN TO USE Use only after the underlying opportunity calculations are defensible.

COMPANY

DATE

SALESPERSON

INPUTS Source: V=verified | C=client estimate | B=benchmark | A=assumption

Conservative annual value

Expected annual value

Aggressive annual value

Implementation cost

Monthly ongoing cost

Annual ongoing cost if applicable

CORE LOGIC Net value = annual value - first-year investment; ROI = net value / investment; payback = investment / monthly value

OUTPUTS / DISCUSSED SCENARIO

First-year investment

Conservative net value / ROI

Expected net value / ROI

Aggressive net value / ROI

Estimated payback period

VERIFY / NEXT STEP

Missing data / verification needed

Recommended next action

YAD CLAIM DISCIPLINE All values are scenarios, not forecasts or guarantees. Do not force assumptions to make a project appear attractive.
